MEMORANDUM FOR: Deputy Director (Support)  
THROUGH : SSA/DD/S *A*  
SUBJECT : Forthcoming Move in L to I Buildings

1. This is to suggest that we experiment in the course of the forthcoming move in buildings L to I with types of partitioning likely to be used in the new building.

2. A number of areas are involved in the move which need to be subdivided with full and part height partitions. Such partitions are a prominent item in the new building budget. It may be advisable now to acquire partitions which can be moved to the new building. It would allow us a chance to experiment with various types of equipment, may mildly alleviate the new building budget situation, and avoid the construction of temporary partitioning due to be demolished, along with the Tempos, after we move.

3. For your consideration.
